This collection of papers highlights the various angles from which the topic learner autonomy can be viewed. "Involving Language Learners" is the result of a one-day conference on autonomy in language learning organized by the Applied Linguistics-EFL Methodology Section of the Dept. of Anglophone Studies at the University of Duisburg-Essen in November 2011. It represents the variety of mostly optimistic talks during the conference.

The conference was hosted on behalf of LASIG, IATEFL’s special interest group on learner autonomy. Participants discussed ideas and experiences concerning learner autonomy and its practical implications, focusing on aspects such as Technology in Language Learning, Content and Language Integrated Learning, Young Learners, Learner Autonomy and Related Concepts as well as Teacher Training and Learner Autonomy in the Tertiary Sector. The brief to all presenters was to discuss ways of involving language learners when designing and reflecting learning events that represent steps towards more autonomy in classroom practice and beyond. Both the limitations and successful outcomes of such initiatives were addressed.

Research papers as well as reports of success stories of practitioners make this book a valuable read for researchers, teachers and trainee teachers alike.

Contents

Katja Heim & Bernd Rüschoff
Introduction

The Secret of Success: Some basics
LEN DAM
The Beginning of a Success Story — a Personal Account
LENHARD LEGENHAUSEN
Principles and Successes in Autonomous Language Learning

Supporting Learner Autonomy at Tertiary Level
ANNA BURKERT
Developing Learner Autonomy at Tertiary Level
NIKOLA MAYER & TANYASHA YEARKWOOD
Guidance and Learner Autonomy in Higher Education: Supporting Students in Reflective Practice

Assessment in and for Learner Autonomy
MARIA GIOVANNA TASSINARI
A Dynamic Model for Learner Autonomy: Raising Awareness through Self-Assessment
RUTH WILKINSON
"Learning to Learn" and the Fundamental Role of Self-Assessment: Successes and Constraints

EVA WILDE
Professional Development and Teacher Autonomy. A Study with EFL Student Teachers
